PROJECT

Extension and refurbishment of existing single storey house

DESIGN SUMMARY

The existing house had been purchased with a view to totally transform it. It is situated within the village of Ballinger near Great Missenden in a sensitive location on the edge of the settlement and within the Greenbelt .

Built c.1960 the house was typical of its type. The client required a re-design to create a 'cottage' style two-storey dwelling with visual and physical links to the garden. A large new family room/kitchen was created as part of the new build, forming the heart of the new house. This had an a linked verandah creating a transition between the house and garden.

The final house was double the size of the existing and included home office, guest room + ensuite, cloakroom, utility, reception, family room (kitchen/living/dining), master bedroom + ensuite, family bathroom, + two further double bedrooms.
