

DESIGN SUMMARY

Lapd were appointed to rationalise, refurbish and extend an existing community hall into a growing new church building for a large Anglican Church in Oxford.

Budget was key to the success of the project and over 100sqm of additional accommodation were created using refurbished modular buildings. These were craned in over the existing building on to prepared foundations and delivered in a single day. Internally pre-finished, only final connections to services were required before they were ready for use.

A new church required a new image, on a budget and we remodelled the front of the church to create a simple but striking elevation with a 'public' outdoor space landscaped to create seating and a place to meet. This creates a vibrant front entrance area and a landmark along the streetscape.
